Layered Tones Tone Numbers 80 through 89. To select a tone. Example 80 STR PIANO This tone layers a strings tone with a piano tone so they both sound when a keyboard key is pressed. Press the TONE button. Appears when TONE button is pressed. Split Tones Tone Numbers 90 through 96 Example 99 PERCUSSION This tone assigns various percussion sounds to the keyboard. Sound Effect Tones. With sound effect tones 77 through 79, the type of sound produced depends on the octave where the key you press is located. When 78 PHONE is selected available sound types are PUSH TONE 1, PUSH TONE 2, RING 1, RING 2, and BUSY SIGNAL. Microphone. Cannon type 3prong. MIC VOLUME dial. The term polyphony refers to the maximum number of notes you can play at the same time. The keyboard has 12note polyphony, which includes the notes you play as well as the rhythms and autoaccompaniment patterns that are played by the keyboard. This means that when a rhythm or autoaccompaniment pattern is being played by the keyboard, the number of notes polyphony available for keyboard play is reduced. Also note that some of the tones offer only 6note polyphony. Low HighDigital Sampling. A number of the tones that are available with this keyboard have been recorded and processed using a technique called digital sampling. To ensure a high level of tonal quality, samples are taken in the low, mid, and high ranges and then combined to provide you with sounds that are amazingly close to the originals. You may notice very slight differences in volume or sound quality for some tones when you play them at different positions on the keyboard. Chord Types Major chords Major chord names are marked above the keys of the accompaniment keyboard. Note that the chord produced when you press an accompaniment keyboard does not change octave, regardless of which key you use to play it. Minor chords m To play a minor chord, keep the major chord key depressed and press any other accompaniment keyboard key located to the right of the major chord key. Seventh chords 7 To play a seventh chord, keep the major chord key depressed and press any other two accompaniment keyboard keys located to the right of the major chord key. ExampleCm. Cdim. Csus4. C minor Cm. Cm7 5. C7sus4. C seventh C7. Minor seventh chords m7 To

And have it mailed in the mail It will bring you to a direct download page, which will then download the manual for the CTK551 Keyboard. Link If you are referring to CT615, you can purchase a PDF copy of manual from ebay Some CASIO CTK5000 models require inverse voltage polarity than most of others adapters have!!! RISC OF BURNING OUT ELECTRONICS!!! There are 2 ways of connecting the keyboard to your PC. Using the MIDI outputs and a special MIDI to gameport adapter if you have a very old system and have a joystick port Dsub shape on your soundcard or PC, then you use that cable. Of course this is legacy and stopped existing in newer computers, now USB is used. Only the professional line of soundcards have direct MIDI inputs. For most of us, with consumer soundcards and PCs, there are no MIDI inputs. The good news is that newer keyboards support USB MIDI and features direct USB connection so all you have to do is install the drivers that are provided with your keyboard, usually a CD, and follow the instruction to install the USB drivers for your casio keyboard, BEFORE you plug in the cable very important! once installed you reboot and connect your keyboard using a USB cable Now if your keyboard is older and has MIDI outputs, like mine for example, you will need to purchase a MIDI to USB adapter, those have MIDI cables in one end that plug to your keyboard and the other end a USB connector. Agree to terms. Select your keyboard from the list and download the manual. And it shows that the tempo is 159, normally its 90 I contacted the customer service but all they told me to do was turn off the keyboard unplug it, plug it back in and turn it on to reset but that didnt work.
