Our library is the biggest of these that have literally hundreds of thousands of different products represented.

## Book Descriptions:

# bounty hunter sharpshooter 2 manual

The concepts This detector is for outdoor use only. Many Most floors contain Coil motion is required The concepts and terminology can be quite unfamiliar if you are new to the hobby. To understand it quickly and to get the most enjoyment possible from your detector, we strongly recommend that you 1 Turn the Sensitivity knob to a low setting if you get false signals. Just follow these steps Using the supplied bolt and knurled knob, attach the search coil to the lower stem. Press the button on the upper end of the lower stem and slide the lower stem into the upper stem. IMPORTANT Your Sharp Shooter II metal detector requires two 9Volt ALKALINE batteries. Follow these steps to install the batteries. Carefully remove the battery compartment door by pressing the release clip on the right side of the door. POSITION THE DETECTOR a. The detector automatically enters the DISCRIMINATION Mode.To Operate 1 Press AllMetal button. The LCD Target Display is accurate Mediumsized gold items will in the Motion Modes only.Many non will push your trashtotreasure U.S. coins of recent vintage will ratio. While the Sharp Shooter II will also register here.If the indoors, turn indicator comes on and stays on, microwave. Most will modes, the detector emits three induce a medium tone. Older pull tabs distinct tones, which classify metal will be eliminated automatically in the objects into categories AUTO NOTCH mode, or alternatively be manually "notched out". Move slowly; hurrying sitive and deepseeking detector. It will cause you to miss targets. Rather, user retuning is critical. The detector does not automatically adjust to changing ground and environmental conditions; the operator is required to make the adjustment. If the detector sounds a constant tone over all areas of the ground, retune the detector by pressing the GroundTrac button. Dig only the repeatable low and high tones, avoid the broken or nonrepeatable tones.<http://gildiamasterov.ru/userfiles/file/cornelius-v4-manual.xml>

OTHER APPLICATIONS Use your Sharp Shooter II to find property markers, machine parts, and lost keys. Keep your detector in motion ALLMETAL mode for these tasks. The following suggestions will help you care for your metal detector so you can enjoy it for years to come. Keep the detector's chassis dry and do not let water enter it. If the chassis gets wet, wipe it dry immediately. Our payment security system encrypts your information during transmission. We don't share your credit card details with thirdparty sellers, and we don't sell your information to others. To hide it, choose Ship in Amazon packaging at checkout.Please try again.Please try again.Show details. Ships from and sold by Amazon.com. Register a free business account Please try your search again later.The LCD readout will indicate the probable target ID of each target being detected. With an excellent recovery rate, easy operation, and lightweight, the Sharp Shooter II is truly a Treasure Hunters dream. The Sharp Shooter II combines ease of use with a visual reference that allows the user to determine what type of metal is being detected, whether silver or gold or lesser metals. Take aim at more treasure with the Sharp Shooter II!The fully submersible, 8inch Bounty DTech search coil can help you find treasures under water or up to 5 feet of earth. The Sharp Shooter II has four modes of operation, ranging from an allmetal detection to a Disc Notch mode that rejects iron and nails and two modes that emit different tones for varying kinds of metal. The detectors digital LCD gives both target ID and depth readout, controls for the four modes of operation, and a lowbattery indicator. Users will also appreciate Ground Trac, which automatically balances the machine to the soil condition, and Bounty Hunters comprehensive, easytounderstand online tutorial and downloadable

manual at [www.detecting.com](http://www.detecting.com). The Sharp Shooter II has a builtin speaker and headphone jack and runs off of two 9volt alkaline batteries. <http://www.gemko.pl/userfiles/cornelius-soda-machine-manual.xml>

Fiveyear limited warranty. Ariel Meadow Stallings Click here to make a request to customer service. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Mary Maples 4.0 out of 5 stars After receiving the detector, I quickly assembled it, reviewed about two pages of instructions and then couldnt wait any longer. I went out to the backyard and fumbled around a bit. It is pretty straight forward. I did need to go back and read the directions a bit to see how to fine tune the detector. In my back yard I have a powerline overhead, so I had to turn the sensitivity down or it would start randomly beeping. I was able to quickly find some pennies, a dime and some old brass hose nozzles in my yard. I took it out to the local school and found several quarters, pennies, a silver heart pendant, and my favorite so far, a 1910 silver Canadian dime. I ended up buying some cheap foam headphones and an adapter to plug it in. They work pretty good for the 7 bucks I spent on the headphones and adapter. I would definitely recommend getting the pinpointer. I didnt get one, and after watching some videos, and doing a couple hours of detecting, it seems those can save a lot of time. I find myself crouching down, digging, standing up, sweeping the detector again, crouching down, dig some more, etc. I still find myself having to turn the sensitivity down as I will start to get a lot of random beeps. Apparently those can come from Electromagnetic interference. Since I am in the suburbs surrounded by electronic devices, that might explain it. Well see how it does when I get out away from the neighborhoods. Anyway, I really like that I spent a bit more to get this detector that has some good features. I dont think this detector goes very deep.

At least not in the discriminator mode. You can use the all metal mode to go a little deeper though. I needed it to find a property pin, which I did find, so Im happy. It has multiple settings and some nice features. Im going to poke around with it and try to find some coins and jewelry and artifacts and whatnot. My only complaint is that the instructions tell you to hold the detector straight down and keep the coil level with the ground as you sweep an area. I cant do that because the main shaft is too long even at its shortest setting. I have to hold the coil away from me a foot or two and thats hard on the arm. The coil head adjusts so I can still keep it level to the ground, but its still tiring. Still, I like it and the price was fair enough for something that I can use to have a little fun. In just a couple of weeks, Ive unearthed dozens of items ranging from square nails to horse shoes to coins. I normally use the detect all metal mode because I enjoy discovering the variety of objects, but it has correctly identified the three coins that I have found as two pennies and a nickel. The unit has excellent range also I found two horseshoes that were buried about a hoof down oops, I meant foot. Batteries have also lasted much longer than I expected. Great fun! One thing I have learned, people do litter way too much. It was buried about 2 feet deep. It did find the coffee can, but it took a while because it also found lots of other stuff. It even found the buried gas line going to the house, which is buried at least 3 feet deep. I had no idea we had so much scrap metal nails, clips, bolts, etc. in our yard! It takes a while to get used to interpreting the beeps, but after a while you can pretty much tell if the buried object is large or small. The controls are a bit complicated, but it works great. It was also used to find buried property markers. All in all Im glad I bought this and I think it will come in handy in the future.

<http://www.bouwdata.net/evenement/3m-thermofax-machine-manual>

Not being experienced with detectors and the features available I first spent time online watching tutorials etc. Recommended! With insight gained from experts the criteria for purchase came down to discrimination, notching, motionless detection, penetration depth, and price. The BH

sharpshooter II met all of these. Particularly the price was interesting as it is a recently discontinued model. To date the unit has performed very well. There is some chatter in the discriminate and notch modes. Mostly big ferrous stuff will set off a random combination of tones regardless of the tuning. Dig a few of these and you quickly learn to listen to what the unit is telling you. Conversely, a solid tone is equally clear to the user once one learns to listen to the unit. Ive found the motionless all metal detection mode particularly useful to gain a sense of the size and general shape of a hit before digging. Of course, the Sharpshooter II will not keep up with the high end professional detectors as some owners of these like so much to point out. For myself, Ive found it to be an excellent combination of features typically found on more expensive machines and price. I recommend it to any weekend warrior looking for extras while also keeping to a budget. Very impressed with how sturdy and light weight it is. Depth seems average and very sensitive. Shipping was fast. Had it in 24 hours. Will be ordering more stuff soon. Sorry, we failed to record your vote. Please try again. Sorry, we failed to record your vote. Please try again. I have enjoyed working with Michael, Daniel and their team at Detector Electronics Corp. They have done a fine job representing the Detector Pro line since it was first introduced in 1996. One of the things I see them do is go the extra mile for their customers. It is always nice to see

a family run business endure and we wish them many years of continued success. We appreciate the partnership from Michael and Daniel at MetalDetector.com. As a family owned business, we choose our partners carefully. We have found that their team has done a fine job of representing our line. With thirty years of success under their belt, we expect that they will be a partner for many years to come. We at Treasure Products, manufacturer of the VibraProbe and VibraTector, want to congratulate Daniel and Michael on the admirable milestone of being in business for over three decades. The dedication and product knowledge that your staff exhibits has been a great benefit to us. We offer our best wishes for your continued success. I have found that the team at MetalDetector.com has done a fine of job representing the entire JW Fishers line. They have partnered with us in helping to bring our products to both individuals, larger corporate and governmental organizations. Michael and Daniel have established a knowledgeable team that has done the job of getting the correct product in to the hands of each consumer. I wish them continued success as they represent our products in the years to come.

I have been impressed by the professional approach and the experience of Daniel, Michael and the entire team at Detector Electronics Corp. Three decades of superior customer care has been the key to their success and large sales volume. We have enjoyed working with Michael, Daniel and their esteemed team at Detector Electronics Corp. We feel that they have been the best choice for representing the good reputation of the Makro Detectors in the region. They have been working towards 100% customer satisfaction ever since they started their cooperation with us as our exclusive Distributor in the USA and Canada. We are pleased to see both their business and the sales in their region continue to grow. It is nice to see both our family business and theirs growing together. We see our companies moving forward together for many years to come. Garrett has a longstanding quality relationship with Detector Electronics Corp since the 1980s. I have seen them grow from a regional dealer to one of the largest internet dealers yet they have maintained that special care for the customer for over three decades. Their team of knowledgeable, helpful and friendly staff and family make their dealership a first choice for the treasure hunter. MetalDetector.com has been a valuable business partner to Fisher Research Labs for many years. They continue to grow while still offering the best in customer service and after sale support, which is very important to FRL. We wish to congratulate them on 3 decades of business and stellar service to our mutual customers. Their entire staffs knowledge of our product helps to ensure the customer gets the right detector for their needs regardless of what they might be. We look forward to our future relationship and continued success of MetalDetector.com and their entire staff. I recently had the pleasure of meeting with the team at MetalDetector.com at their newly expanded facility in Southborough, MA.

I have to say that I was impressed with their operation and knowledge of the Teknetics product line. When the Teknetics product line was recently relaunched, MetalDetector.com was one of the first partners we contacted. They have had a long standing relationship with the brand as one of the original Teknetics dealers in the country. We value long standing relationships and are excited to have them as a member of our team. Its been an honor and privilege working with the fine folks at Detector Electronics for over 25 years. Its no surprise that Sondra and Davids fine sons, Michael and Daniel have continued in their parents tradition of being exemplary businesspeople who take the time and care enough to really know their clientele. Its always been a pleasure working with you. DRS Electronics, GmbH is proud to have Detector Electronics Corp. I have known Michael and Daniel for over a decade. Their team is genuine and knowledgeable. They provide exceptional support and service to our customers. They are a recognized leader in the industry. Internationally their business is known for excellent customer support. Their presence is a great confidence for treasure hunters.

MetalDetector.com has been a great business partner for many years and the best choice for representing Makro Detectors in the USA. With the addition of Nokta products to their product portfolio in 2018, we are confident that our businesses will continue to grow together for many years to come. Gary Micheau CEO Whites Electronics Gary Storm Owner Detectorpro Ingrid Hawk Partner Lesche Products Michael Bernstein Owner Treasure Products, Inc. By the end I felt I was dealing with a friend rather than a faceless company on the net. Well done! And, by the way, my 7 year old son Juanito found a nickel yesterday when he took his detector out for the first time. If things keep going this way the detector will have paid for itself within a few short decades.

But seriously, he is really enjoying it and hoping to find his longdreamedof buried treasure some day. Happy to do business with you, Hello Dan, Remember me. I bought my Tesoro Tiger Shark from you. It came just when you said it would, and works just as you told me it would. Thanks for your help in sorting through the maze of detectors. Dear Sondra, 1160 GRAM Meteorite. Dont ask where. One of many! As far as being excited I all most had a stroke. Heres a photo of one Meteorite I found on the surface, over 800 grams and a 447 gram one. The one in the middle is my first. The bar magnet has some small Iron meteorites on it. Dear Detector Electronics, I received the Tesoro Sand Shark today.and want to thank you. Tried it, love it, looking forward to many enjoyable hours with it. Thanks again. Dear Customer Service, Just wanted to thank all involved in a recent shipment to me that was a gift for my grandkids. I ordered 2 detectors but for some reason only one was shipped. After calling your company you bent over backwards to get the second detector to me on time for giving to my grandchildren. I explained that we exchange gifts a week early so my children and their families can be in their homes Christmas morning since some travel distances are involved. The second detector arrived last Friday in time for our celebration last Saturday. THANKYOU. I order quite a few things online and have experienced some terrible companies but you are the best. Best regards and have a wonderful Holiday Season Hi Guys, I have just come in after spending an hour or at my local beach with my son, which is only a 5 minute walk from my home called Deception Bay. This is the first time i have ever used detector. The very first thing it detected in less than a minute was a two dollar coin, boy we were so excited. Not by the amount, but by the fact that on its maiden voyage it detected a coin. We then detected a ten cent piece.

We cant wait to take it to a popular beach and I will practice more with the settings. I would like to thank you for your prompt service. My detector arrived at my door In Brisbane Australia in less than a week. This is the first time I have used any service like this outside of Australia, but with this kind of service and ease of buying and your range of goods this will be the first of many transactions. I just wanted to say thank you to Scott who made my recent purchase so pleasant. I am enjoying my Tesoros and have found lots of cool stuff so far. Just waiting for that first gold find. Thanks agian for all the help that was provided in making my decision. Hi Scott, I was amazed at how fast I received my BOUNTY HUNTER. The order arrived in perfect condition, and in only three days after I placed the on line order. The four part series about selecting the right product was also appreciated and helped me to make the right decision for my purchase. You are truly a company that takes care of business and most importantly your customers. It is a pleasure doing business with you and I will gladly recommend you to anyone that wants to buy a metal detector. Thanks for the GREAT SERVICE. Dear Customer Service, I am a very happy camper. Yesterday I took my Garrett Ace 250 out for the first time to some local parks. My total find was about 150 coins. The detector works so well and so easily. It only took me about a half an hour before I new what every button did. PS I plan on buying my next detector from you. Dear Sondra, I purchased an Ace 250 from your site for my 7 year old son and now I am hooked. This is our first metal detector and the Ace does every thing it says it will. Thanks for the fast delivery and introducing my son and I to a great new hobby. Coin shooting in Pensacola, Fl Sondra, I got the detectormy husband was thrilled. Thank you so much. You and Daniel have been so helpful. I am a first time buyer and am feeling very lucky to have found your website.

Daniel helped me to locate a really great detector and you have been extremely courteous and prompt in seeing my order through. I look forward using my new metal detector. Hope you have a wonderful holiday season. Overall my experience ordering off of your website was convenient and customer service was great. Thanks again. Dear MetalDetector.com I just want to thank Sondra and the rest of the gang for my Minelab Explorer SE. It was a pleasure doing business with you and I will recommend your fine business to my other detecting buddies. Anita S. and Juan G., United Kingdom Mike T., Rockport, MA John B., San Diego, CA Dana, Mystic, CT Dick H. Steve M. Nick V., Churchville, PA Duane B., Springville, NY Bill B. David and Josh Lori G., Bessemer, AL Jason R, Massachusetts Our NoHaggle, BestPrice Guarantee on Metal Detectors The same low pricing for everyone. Whether you're a metaldetecting expert or novice, we keep it simple. We offer the lowest advertised pricing allowed by contract with each manufacturer. The personalized service you receive from our experienced team is our added bonus. That's what we are all about. Rest assured, you will not find a better value online. Visitor I received the parcel today. Dan Great! It came right to your home. This is our first metal detector and the Ace does everything it says it will. We Ship Direct To You Detector Electronics Corp. Michael and Daniel lead the MetalDetector.com team. Each day we set out to provide you with the best customer experience in the industry. Wherever you are in the world, product specialist Maria is here to help. Maria speaks fluent English and Spanish. Heather interfaces between our office and warehouse teams to help expedite orders to our customers around the world. Moe is not only one of our product specialists; he was also one of our first customers. He has been metal detecting since 1989. Dave keeps all of the great deals and products that you see on our website up to date.

When it comes to managing the warehouse to get the orders to our customers quickly and efficiently, Bob, Matt and Jake are our A team. Tom, Diana and Javier work closely with our customers to provide the highest level of customer care in the industry. Before shipments are accepted from vendors, our team closely inspects inbound orders for accuracy. As metal detectors and accessories are received, our team packages and labels each item. Large shipments arrive from vendors in bulk. They are stored in our newly constructed bulk goods warehouse. Inventory is transferred from the bulk goods warehouse to our main warehouse where orders are picked, packed and shipped to customers. As customer orders arrive in the main warehouse our team hand picks the items. The items picked are checked for accuracy throughout the process. Michael and Bob confer on an item as an order is pulled for a customer. Once picked, orders flow down the conveyor on their way to the packing station. As the order nears the final stages of the process, each order is over packed and then cushioned with recycled materials. Michael adjusting an early Garrett Metal Detector in North Carolina at the first treasure hunt we ever displayed our products at back in 1985. Sondra on the road again helping a customer learn about the hobby at a metal detector show. Daniel and Sondra, posing for a picture while on a family metal detecting vacation in the Caribbean. Sondra and Daniel at another one of the hundreds of treasure events that they attended in the early years across the United States. Michael and Daniel pose for a picture inside the Minelab headquarters in Adelaide Australia while attending a distributor meeting. Michael and Daniel attend Treasure Week in Seymour Indiana, one of the largest organized treasure hunts in the country. David, Michael and Daniel posing after a day of metal detecting at the beach. In the early years Sondra worked tirelessly and wore many hats.

David and Sondra never envisioned that we would ever outgrow this space.
